STEEL FLARELESS ADAPTERS (SFLARELESS)

Applications:

Hydraulic service, instrumentation and chemical processing. Highly recommended for high pressure and high vibration applications. Connect many varieties of tubing without flaring. Use with aluminum, hard or half-hard copper, steel, stainless steel, and heavy wall tubing that cannot be flared.

Working Pressure:

Dash Size	Tube O.D.	PSI (W.P)	Tube Wall
-4	1/4	5000	.030
-5	5/16	5000	.032
-6	3/8	4000	.032
-8	1/2	3000	.032
-10	5/8	3000	.035
-12	3/4	2500	.035
-14	7/8	2500	.035
-16	1	2000	.035
-20	1-1/4	1150	.035
-24	1-1/2	1000	.035
-32	2	1000	.035

Working Temperature:

-65°F (-54°C) to 250°F (120°C)

Steel flareless fittings now have hexavalent chromium-free zinc plating, this will replaces the black phosphate.
