

Data Sheet

KL 361 JF Rolls with cloth backing for Stainless steel, Steel, Metals, NF metals, Wood

Applications

Stainless steel	●
Steel	●
Metals	●
NF metals	●
Wood	●
Plastic	○

Properties

Bonding agent	Resin
Grain	Aluminium oxide
Coating	Close
Backing	JF-cotton

Klingspor abrasive roll KL 361 JF – the roll with cloth-reinforced backing for a multitude of materials

The abrasive roll KL 361 JF with **brown cloth** stands out with its exceptional quality and **suitability for universal use**. Highly adaptable, the product allows for precise grinding across a wide range of materials including steel, NF metals or plastic. Ideally suited for sanding contours, the abrasive roll lets the user work with great efficiency and without any effort.

All-purpose abrasive cloth for clean grinding on a host of different materials

The abrasive roll KL 361 JF with **brown cloth** is guaranteed to deliver precise grinding across a wide range of different materials. The cloth-reinforced backing is composed of JF cotton, which is distinguished by its high degree of flexibility and adaptability. The abrasive used is aluminium oxide with a close coating and synthetic resin bond. It allows for the grinding of:

- Stainless steel
- Steel
- Metals
- NF metal
- Wood

The lightweight and highly flexible cloth makes it possible to use the abrasive roll to sand highly profiled workpieces. Suitable for a comprehensive range of applications, the abrasive roll is equally suited for sanding by hand and mechanical grinding with a variety of standard grinders.

Versatile – thus suitable for a multitude of shapes

Its cloth-reinforced backing furnishes this abrasive roll not only with a **very flexible cloth** but also turns the product into a tool equally capable of coarse grinding and finishing. It contours to the workpiece perfectly, allowing the user to work with utmost precision and professional efficiency. Covering an extensive range of grit sizes, this abrasive roll is equally well suited for coarse grinding and finish grinding. The abrasive roll KL 361 JF is available in different grit sizes that vary with the material and the intended purpose. Since offering the same length of 50,000 mm for all grit sizes and widths, the product can be used for a wide variety of applications. You can easily and cleanly tear off a sheet of abrasive in the exact size you need for your particular purpose and the machine you are using.
