

COMBINATION NIPPLES

Product Information

Combination Nipples are widely used in a variety of low-pressure industrial hose applications. These fittings have male NPT thread one end by hose barb. They are available in unplated steel and stainless steel. Victaulic grooved is also available when application involves piping systems. Combination Nipples are not suitable for compressible products such as air, steam or nitrogen.

Notes

Combination Nipples are intended for low pressure discharge and suction service. * Not suitable for compressed air

UNPLATED- HOSE SHANK X MALE NPT
