Be prepared for the unexpected.

Whether you're working on a project outdoors or doing maintenance work inside, being properly equipped for oil, grease or hazardous liquid spills is essential.

Having a spill kit nearby greatly reduces the effects of a spill by controlling the spread of the liquid and stopping it at the source. Our kits come ready with all the tools you need to handle the situation.

Our spill kits are offered in three formats with an assortment of sorbents, safety gear and disposable bags with the exception of our specialty kits which are tailored for specific situations.

Oil Only (White) These sorbents are excellent for absorbing oil-based spills as they have a water repellent (hydrophobic) property.

Universal (Grey) Perfect for typical indoor spills where both oil and water based liquids need to be cleaned up.

Hazmat (Yellow or Green) Similar to universal pads, they absorb both water and oil based liquids. The colour acts as an indicator that the liquids spilled are hazardous and should only be cleaned up with the proper protective equipment and knowledge of how to address the liquid substance.

In order to best suit your needs, our kits are offered in an array of sizes ranging from convenient 5 gallon bags all the way to heavy duty 97 gallon containers and everything in between.

Stationary: Best placed in easily accessible locations near potential spill sites. These kits come in sizes ranging from 10 to 97 gallons.

Portable: Portable kits come in convenient sizes of 5, 10 and 17 gallons making them a great choice to keep in your vehicle or in areas where there is only a small amount of liquid nearby.

Mobile: These spill kits on wheels offer the absorption capacity to deal with larger spills as well as the mobility required to bring the kit to where it is needed most. Mobile spill kits are offered in formats starting at 30 gallons up to 97 gallons.
